Abstract: EPA is required under section 183(e) of the Clean Air Act to regulate Volatile Organic Compound (VOC) emissions from the use of consumer and commercial products. Under regulations promulgated on February 26, 2007 (72 FR 8428) manufacturers of new portable gasoline containers are required to obtain certificates of conformity with the Clean Air Act, effective January 1, 2009. This ICR covers the burdens associated with this certification process. EPA reviews information submitted in the application for certification to determine if the container design conforms to applicable requirements and to verify that the required testing has

been performed. The certificate holder is required to keep records on the testing and collect and keep warranty and defect information for annual reporting on in-use performance of their products. The respondent must also retain records on the units produced, apply serial numbers to individual containers, and track the serial numbers to their certificates of conformity. Any information submitted for which a claim of confidentiality is made is safeguarded according to EPA regulations at 40 CFR 2.201 et seq.

Form Numbers: None.

Respondents/affected entities: manufacturers of new portable gasoline containers from 0.25 to 10.0 gallons in capacity.

Respondent's obligation to respond: mandatory 40 CFR part 59, subpart F.

Estimated number of respondents: 8 (total).

Frequency of response: yearly for warranty reports; at least once every five years for certificate renewals.

Total estimated burden: 250 hours (per year). Burden is defined at 5 CFR 1320.3(b)

Total estimated cost: \$32,419.45 (per year), includes \$20,452 annualized capital or operation & maintenance costs.

Changes in Estimates: There is an increase of 71 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase of the estimated burden and cost estimates is due to a change in the estimated cost of labor and additional testing requirements for new portable fuel container families to comply with the requirements for evaporative testing promulgated in 40 CFR part 59.
